US Composting Council Selects CHMS for Association Management Services

Capitol Hill Management Services Continues to Grow

Capitol Hill Management Services (CHMS), with offices in Albany, New York and Raleigh, North Carolina, is pleased to announce that it has been selected to provide association management services to the US Composting Council (USCC). CHMS will also be providing financial management services to the Composting Council Research and Education Foundation (CCREF).

USCC advances compost manufacturing, compost utilization and organics recycling to benefit our members, society and the environment. USCC is the only national organization in the United States dedicated to the development, expansion and promotion of the composting industry.

CHMS will be providing administrative and operational support for the organization and assisting in the growth of its professional development and certification programs, as well as working with the USCC's Executive Director to achieve the highest level of success for the organization.

"USCC encourages and supports compost related research, the promotion of best management practices, the establishment of standards, and the education of professionals and the public about the benefits of composting and compost utilization—we are excited to assist them as they help advance compost manufacturing and utilization to create healthy soils, clean air and water, a stable climate and a sustainable society," said John A. Graziano, Jr., CHMS President. "We welcome USCC to CHMS and look forward to working with the organization's Executive Director to advance the Board's mission and ensure a successful future."

About CHMS

CHMS is a consulting firm specializing in association management, non-profit development, government relations and public policy research.
